Join us for a lively discussion about Delta levee standards – the differences between the Hazard Mitigation Plan (HMP) Standard and the PL 84-99 Standard and what that means for Delta conveyance, habitat and public safety

Perspectives on the standards related to these areas will be presented by California Department of Water Resources officials, in-Delta residents and water agencies, and the Army Corps of Engineers. **A seven-member response panel will then have its say.** Hear firsthand from representatives of the water export and environmental communities as well as Delta residents and representatives, and state and federal officials as they offer their viewpoint about what levee standard is appropriate.

Registration: \$125. Fee includes all educational materials, coffee breaks, lunch and a hosted reception. **Scholarships are available.**
